

Toxic Products

This information sheet will open your eyes about where and how common consumer products are made in China. We in the US are accustomed to automated factory manufacture of products like clothing, personal grooming items, spices and foods, etc.

In China many simple to manufacture items are done by slave labor in jail, prison and labor camp workshops that are filthy beyond the imagination of ordinary Americans. Finished products are packaged in these workshops or in jail cells, again in dirty, unsanitary conditions.

If you have children or grandchildren, you must read this.

The information sheet is free to download. Feel free to copy it and pass it on. Contaminated Products Info Sheet
